SUMMARY

Focused and adaptable professional with a strong commitment to learning, growth, and delivering high-quality results. Known for problem-solving abilities, collaborative mindset, and dedication to achieving organizational goals.

SKILLS SUMMARY

- **Languages:** Python, SQL, Java
- **Machine Learning:** Scikit-learn, Pandas, NumPy
- **Data Analysis & Visualization:** Matplotlib, seaborn, Power BI, Excel
- **Deep Learning:** TensorFlow, Keras, PyTorch, CNN, RNN, NLP
- **Tools/IDE's:** MYSQL, Jupyter Notebook, Google Colab, VS Code Editor
- **Version Control:** Git, GitHub
- **Others:** Data structures and Algorithms, StreamLit

INTERNSHIP EXPERIENCE

AI & ML Internship, IBM Skills Build (AICTE)	06/2025 – 07/2025
• Built and deployed a machine learning model for sales prediction using Python. • Performed data cleaning, EDA, and feature engineering with Pandas and NumPy. • Improved model accuracy through hyperparameter tuning and cross-validation. • Gained hands-on experience in AI ethics, responsible AI, and real-world ML applications.	Virtual

PROJECTS

Image Classification Using CNN, Link
• Developed a Convolutional Neural Network (CNN) model using TensorFlow/Keras to classify images into 10 object categories from the CIFAR-10 dataset. • Achieved 82% test accuracy, demonstrating effective model tuning and performance optimization. • Applied techniques like dropout, batch normalization, and ReLU activation to improve performance. • Tools Used: Python, TensorFlow/Keras, NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, Google Colab.
FastAPI Payslip Generator & Automated Email System, Link
• Built a FastAPI backend to generate PDF payslips and email them automatically using SMTP. • Processed Excel/CSV payroll data and created custom A4 PDF templates using ReportLab. • Implemented async processing and error logging for bulk employee handling. • Tools Used: Python, FastAPI, Email ReportLab
Customer Sales Analysis, Link
• Built and deployed classification models to predict customer sales outcomes using historical data. • Performed data cleaning, feature engineering, and exploratory data analysis (EDA) to uncover patterns and trends. • Implemented Random Forest Classifier, achieving accuracy of 87% and F1-score of 0.84 on test data. • Tools used: Python, Pandas, Scikit-learn, Matplotlib.

EDUCATION

B.Tech - Artificial Intelligence and Data Science,	2022 - 2026
Dhanalakshmi Srinivasan Engineering College	
CGPA – 8.0	

CERTIFICATIONS

Introduction to Machine Learning - NPTEL	Machine Learning Specialization - Coursera
Data Science Masterclass - Udemy	IBM Deep Learning - Coursera
Intro to SQL - Kaggle
